LANDERS, FRARY & CLARK.

NEW BRITAIN, CONN.

53 CHAMBERS ST., N.Y.

It is with great pleasure that we offer to our friends and customers, in the following pages, a complete Catalogue and Price List of the articles of our production.

We have aimed to furnish a FULL LINE OF GOODS IN EACH CLASS, and have spared no pains to make this edition comprehensive and accurate.

New and improved machinery and largely increased facilities will enable us to fulfill our desire of promptness in the execution of orders, and it will be our constant endeavor to maintain the high standard which has been adopted for all goods of our manufacture.

New designs and patterns will be added, from time to time, to our variety, and supplemental editions will apprize our customers of the same.

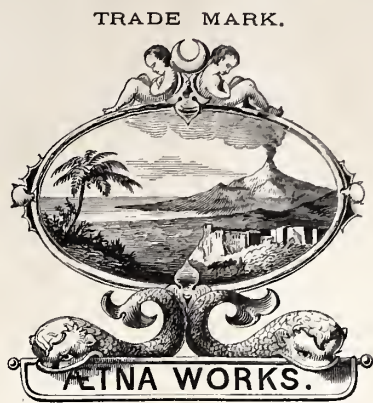

Very respectfully,

LANDERS, FRARY & CLARK.

January 1, 1869

TABLE CUTLERY.

The quality of Table Cutlery offered by us for two years past has won the approval of the trade and stimulated the efforts of all manufacturers of this article.

Skilled workmen, the best of machinery, and untiring efforts, have given us the most complete cutlery establishment in America; and we assure our friends, to whose kind co-operation we, in a great measure, owe our success, that, in the quality and finish of goods, we shall take no steps backward.

THE PATENT NICKEL SHELL BOLSTER,

Originating with and patented by us, has fully proved itself durable, both in finish and strength. The mixture of this metal is alone known to us, and we would respectfully caution the trade against numerous worthless imitations manufactured of lead, antimony, etc.

We would call especial attention to the LINE OF CARVERS known as the "HAMMER BRAND," and stamped  *All blades bearing this trade mark are made from Double Shear Steel, and warranted perfect.*

THE SILVER OR NICKEL PLATED CUTLERY

Of our manufacture, is of the finest quality, and all articles bearing our trade mark  *are warranted 8 oz. plate.*

Many new articles and styles, recently added to our productions, are fully represented in the annexed pages.

SPECIAL ATTENTION

IS CALLED TO THE NEW INVENTION OF

Electro Plating with Pure Nickel.

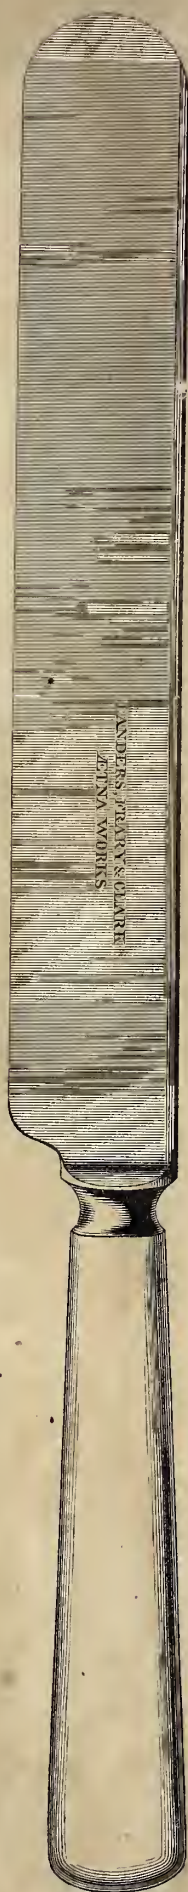

Having recently become associated with the "Remington Nickel Plate Company," we are applying this new and valuable invention to many articles of Cutlery and Hardware, to which it is so well adapted. The properties of Nickel are well known, and articles plated by this process receive a beautiful finish and are protected against rust or tarnish in the slightest degree.

For rights to use the "Remington Patent," communications may be addressed to us, Mr. Geo. D. Allen, Treas., 24 Kilby St., Boston, or E. A. Quintard, 9 Pine St., New York.

FAUCETS,

BRASS, IRON, WOOD AND PEWTER.

MOLASSES GATES, ETC.

BRASS COCKS.

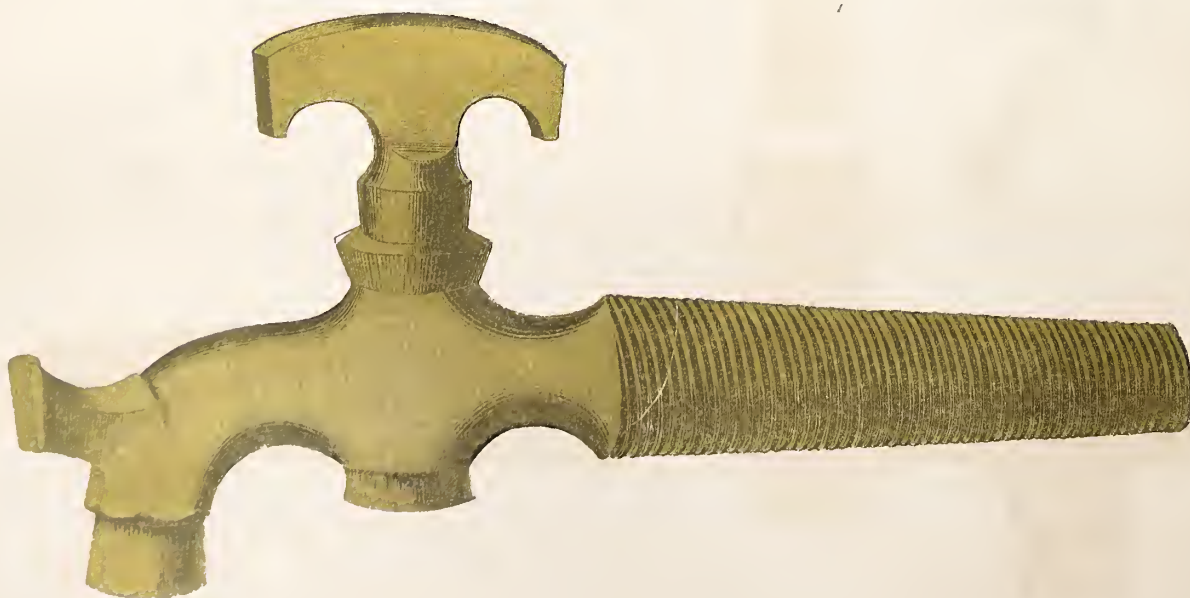

We are furnishing a line of Brass Cocks, with especial reference to the wants of the hardware trade. We test each faucet with one hundred pounds water pressure, and hence *guarantee every one* perfectly tight. Our patterns are of the newest and most approved styles, and the "finish" of this class of goods bearing our stamp is too well known to require any comment from us.

SPRING BALANCES.

FRARY'S IMPROVED CIRCULAR SPRING BALANCES.

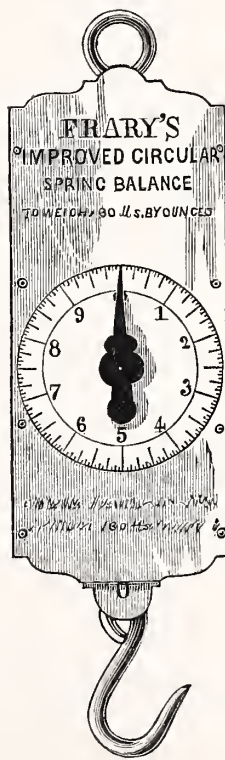

N. B.—Every Balance stamped “Frary” is warranted correct, and a full guarantee of the same always given.

This Balance has several improvements over the Balances heretofore made. Our Racks and Pinions are much finer and smaller, which enables us to make the Balance much shorter, using less length of springs. There is special attention paid to the durability of this Balance, all its parts being made in the most substantial manner. Our workmen having had an experience of twenty years in the manufacture of these goods, enables us to produce as good an article as can be made.

-------------------------------------	-----------	--------

TURNBULL'S PATENT COTTON BEAM.

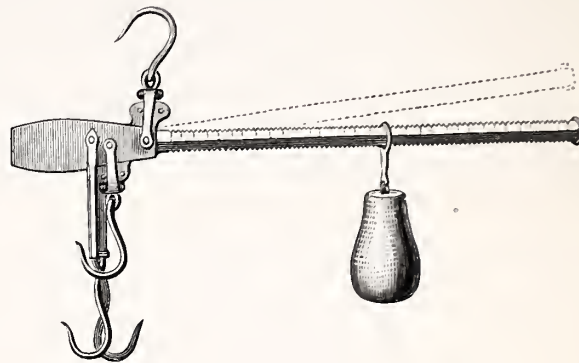

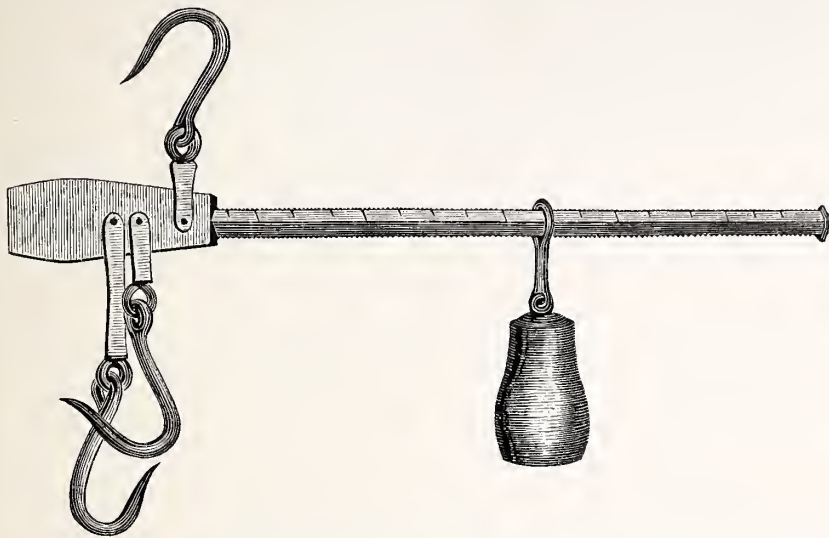

STEELYARDS.

This class of cheap Steelyards having been so long known in market, requires no description. They have formerly been cheapened in price and quality, by which many kinds become of no value for dura-

bility or correct weighing. We are now making and will warrant a better and more correct weighing Steelyard of this class than ever before offered in market.

	Per Dozen.		Per Dozen.		Per Dozen.

COUNTER SCALES.

TURNBULL'S

NEW PATTERN FAMILY SCALE.

WARRANTED CORRECT.

Each and every part of the Scale is constructed in the most substantial manner, all the bearings being of the best wrought material, and not of common grey iron. The beam and fork are made entirely free and separate from the other parts, thus allowing a freedom and accuracy of movement which can be found in no other Scale. The springs are of the very best steel wire, tempered, and as to the general accuracy, durability, and finish of the Scale, we refer you to our Spring Scales and Balances of all descriptions, now in use by the public generally.

Each Scale is securely packed in paper box. Wood cases, of one-half dozen.

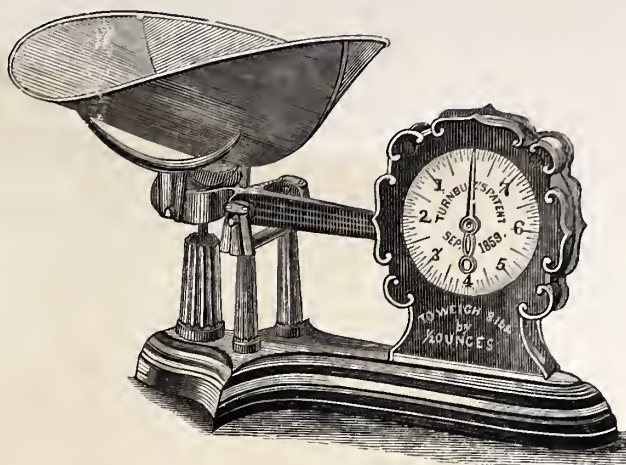

No. 53, 8 lb. Scale, with Platform.	per dozen, \$30 00	No. 56, 16 lb. Scale, 18 inch Tin Scoop,	per dozen, \$36 00

No. 59, 32 lb. Scale, with Glass Sash,		per dozen, \$60 00	

COUNTER SCALES.

TURNBULL'S PATENT COUNTER SCALES.

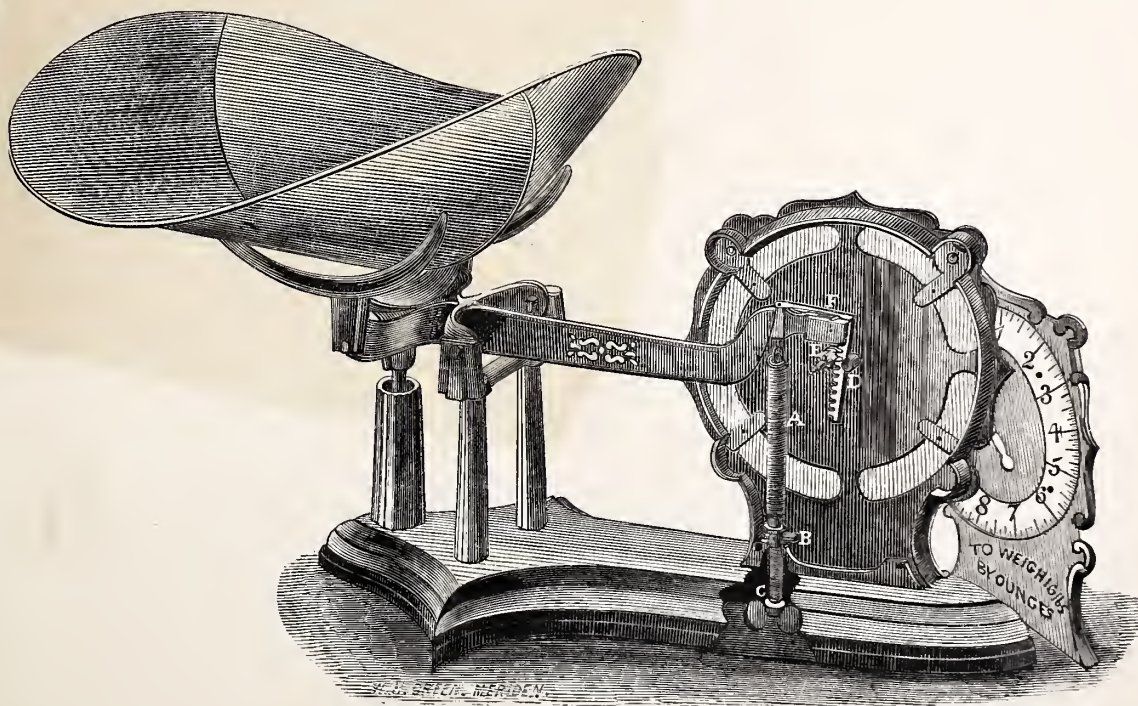

Patented September 13, 1859.

The universal satisfaction given by these Scales for the past ten years, as evinced by largely increased sales, justifies us in recommending them to all for correctness, utility and durability. The internal mechanism of the Scale is clearly shown by the engraving; special care being taken with each and every part.

No. 10.

No. 10, Capacity $\frac{1}{2}$ oz. to 8 lbs., with Tin Scoop,	each,	\$5 50
No. 11, " $\frac{1}{2}$ oz. to 8 lbs., " " Glass Sash,	"	6 50
No. 12, " $\frac{1}{2}$ oz. to 8 lbs., " Brass Scoop, "	"	7 50

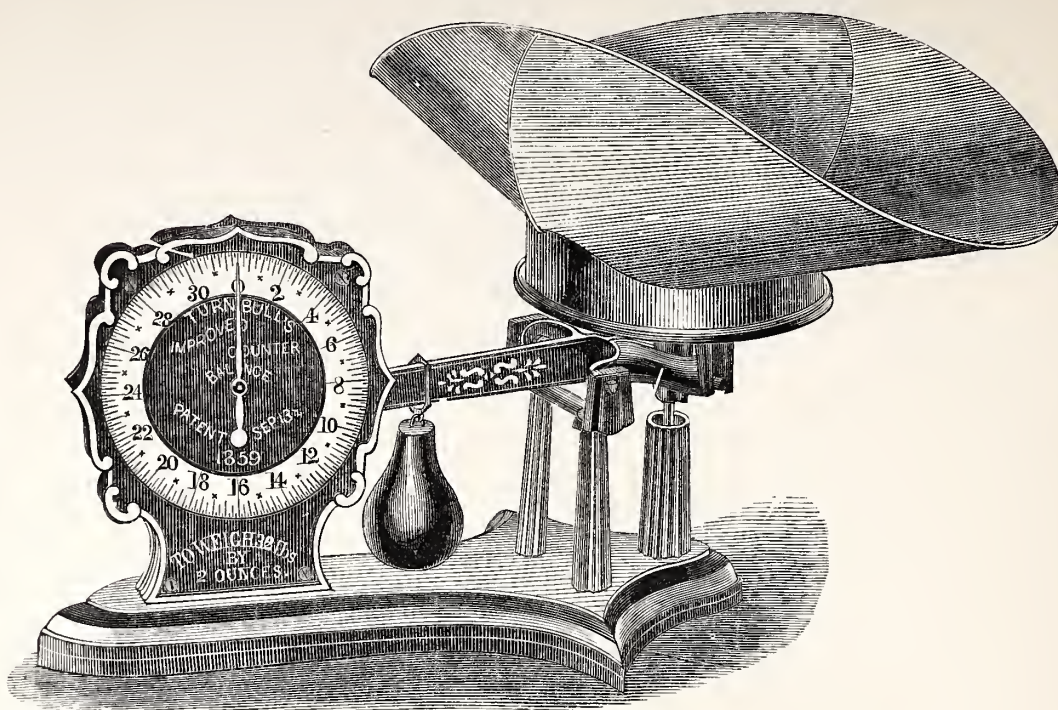

The spring is of very best quality steel wire, tempered, stretching only one-third the distance of the common circular balance in weighing same amount, and will never get weak or out of order. The bearings are all hardened; the pivots of best quality steel, hardened. By means of thumbscrew C, the scale can be balanced more readily than any other known, and no pains are spared to make it the most complete Scale in market. They are warranted to give satisfaction.

No. 20, Capacity $\frac{1}{2}$ oz. to 16 lbs., with Tin Scoop,	each,	\$6 00

PERRY'S "EXCELSIOR"

MEAT STUFFERS AND CUTTERS.

PERRY'S PATENT "EXCELSIOR" MEAT STUFFER.

Patented March 24th, 1868.

The "Excelsior" Stuffer is of the simplest construction, as may be seen from the Engraving. It is strongly built, without being clumsy or "awkward," can be easily cleaned, and is guaranteed to stuff faster and more evenly than any Stuffer in market.

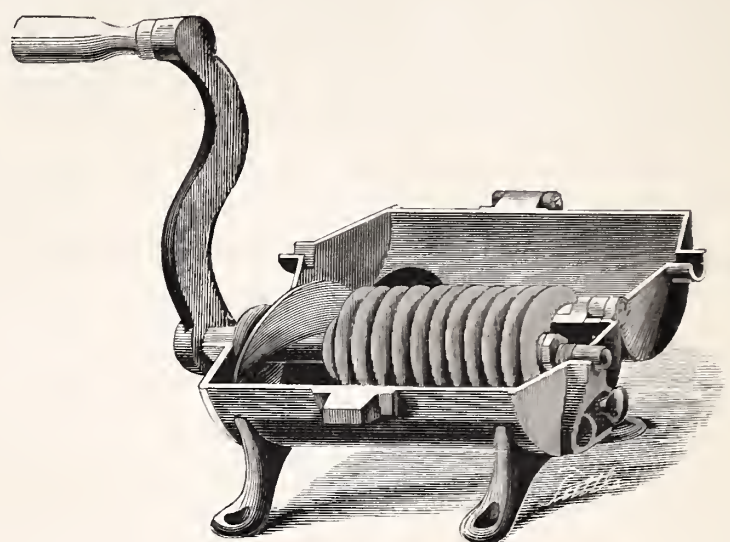

In cases of one-half dozen.

No. 1, per dozen, \$15 00.

PERRY'S "EXCELSIOR"

MEAT STUFFERS AND CUTTERS.

PERRY'S PATENT "EXCELSIOR" MEAT CUTTER.

As the result of many careful tests and experiments, we offer the "Excelsior" Cutter as the best article of this class of goods yet produced.

It cuts the meat very rapidly, and can be easily adjusted to cut fine or coarse, as may be desired.

The knives are of the very best quality steel hardened and tempered, and so arranged on the shaft as to be easily removed for the purpose of grinding, or if desired can be readily sharpened with a flat file without removal from the shaft.

It can be cleaned with the greatest ease, as the shaft, knives and "comb," can be instantly removed, presenting an entirely smooth case.

Our castings are all clean and smooth, handsomely japanned, and we furnish an article in every way calculated to please the consumer.

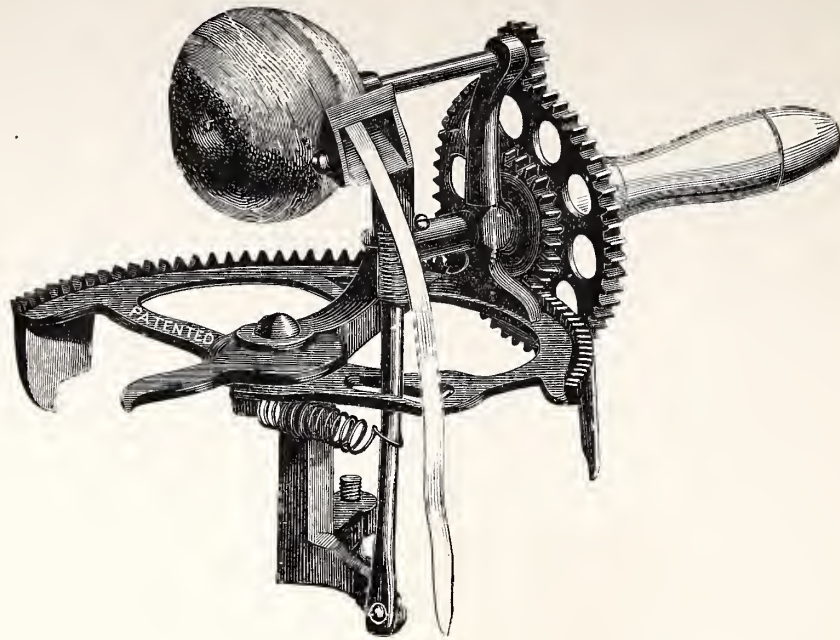

Nos.	1	2	3
Per dozen,	\$25 00	30 00	40 00
Length of Cylinders,	5½	6½	7½ Inches.

IVES' NEW AND IMPROVED PATENT GLASS KNOBS.

These Picture Knobs being made in many different colors, a contrast in harmony with any shade of paper, border or fresco can be selected. The head being solidly connected with the Screw, the Knob is easily affixed to any wall where a screw will hold, and the gold and silver supports, while enabling a solid fastening of the Knob to be made to a *lath and plaster wall wherever desired*, add to the brilliancy of the glass head a richness of finish which makes these Picture Knobs the most perfect in design, manufacture, and adaptation, ever offered in the market.

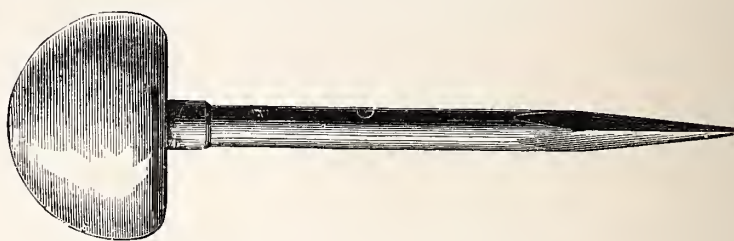

SOLID HEAD AND SCREW PICTURE KNOBS.

Patented Feb. 18, 1868.

No.	Gold or Silver-plated Support.	$\frac{3}{4}$ in. Knob. $1\frac{1}{2}$ in. Screw. Per gross.	$\frac{3}{4}$ in. Knob. $1\frac{3}{4}$ in. Screw. Per gross.	1 in. Knob. 2 in. Screw. Per gross.	$1\frac{1}{4}$ in. Knob. $2\frac{1}{2}$ in. Screw. Per gross.

BETT'S PATENT BURGLAR-PROOF SASH FASTENERS.

Patented April 21, 1868.

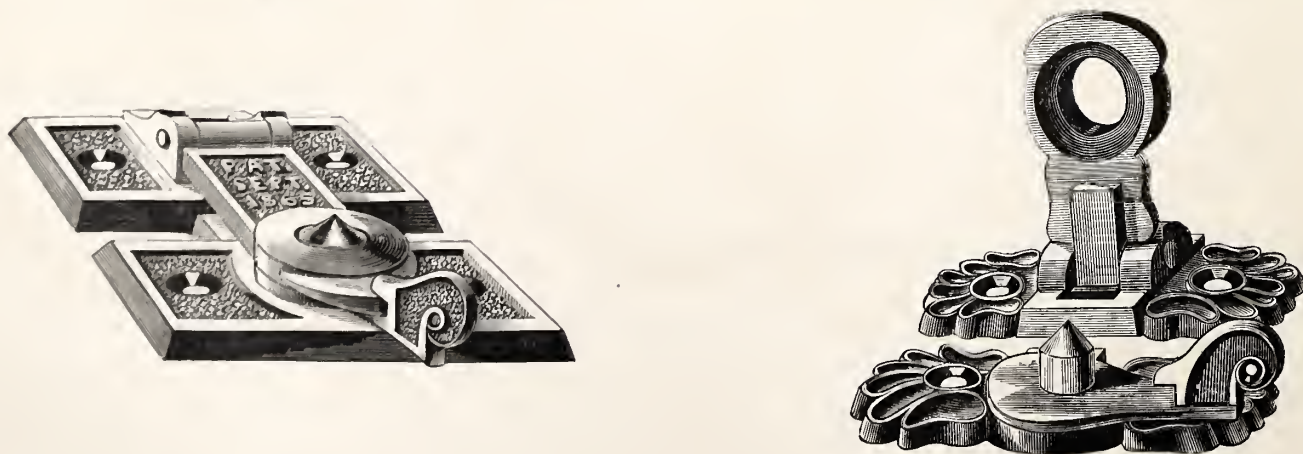

These Fasteners are of the most simple construction, as may be seen from the engraving, yet they hold the Sash more firmly and afford greater protection than any Fastener in the market.

No. 100, Japanned,	per gross, \$7 50	No. 201, Brass,	per dozen, \$6 00
No. 101, "	" 9 00	No. 300, Silver-plated,	" 7 50

JUDD'S PATENT BURGLAR-PROOF SASH FASTENERS.

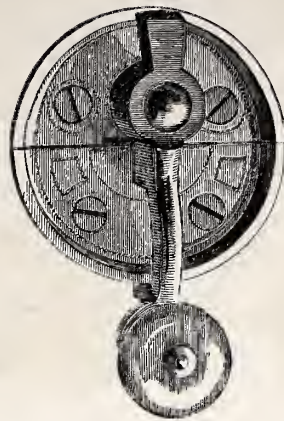

These Sash Fasteners are made burglar-proof; they cannot be unlocked from the outside; are made to hold the Sash perfectly tight, which avoids all rattling. They are an ornament to a window, and made strong and durable.

No. 50, Heavy, Cast Brass, Silver-plated,	per dozen, \$8 00	No. 54, Cast Brass, Fancy, Bronzed,	per dozen, \$5 75

No. 53, Cast Brass, Fancy,	" 5 00	No. 57, Iron, with Brass Sweep,	" 2 25

JUDD'S IMPROVED SASH FASTENERS.

Patented June 30, 1863.

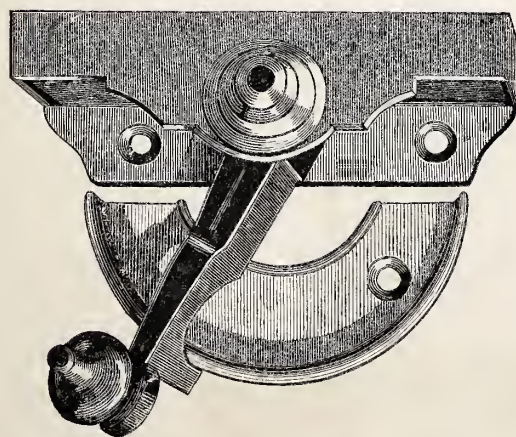

The desirable object of diminishing the size of Sash Fasteners while the strength is increased, has been gained by this method of construction; also security against the Lever being turned from the outside, with the means now frequently used by Burglars, in opening the ordinary Sash Fastener. A helical spring is placed within the hub of the Lever, to keep it in position, which can neither wear out nor break.

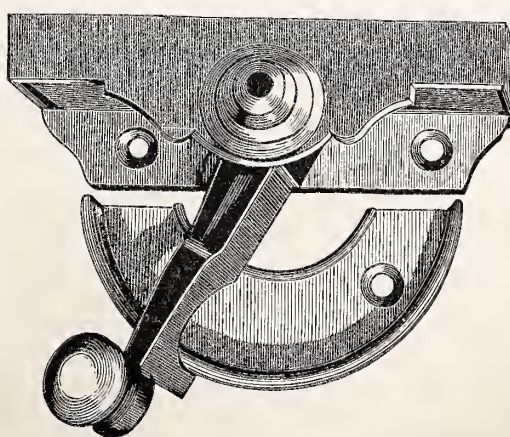

In various styles of finish, Brass, Bronzed, Plated, Porcelain Knobs, and of Iron.

SCREW WRENCHES.

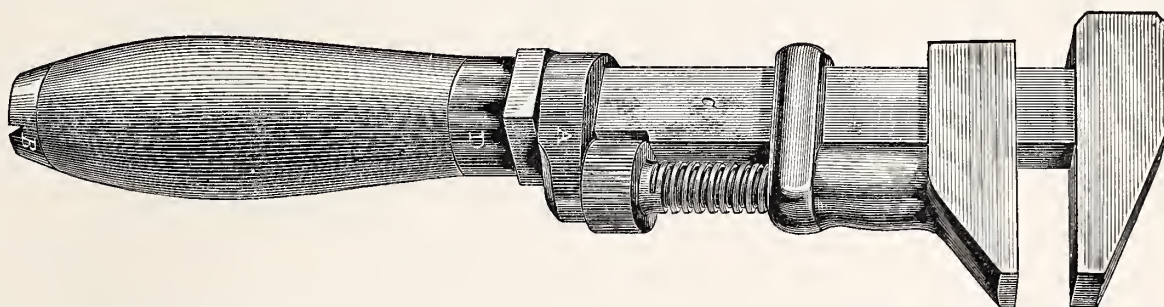

COE'S WRENCHES.

No pains will be spared to make this Wrench superior to any offered to the trade. Each and every part is made of the best material, and thoroughly case hardened. By means of our new patented Rivet we fasten the Bar, Ferule and Handle firmly together, thus preventing the parts from working loose. We warrant every Wrench sent out by us.

TALLMAN'S IMPROVED OILER.

Patented September 1, 1868.

This simple and yet important improvement secures all that is needed to make a perfect Oiler, the requisites of which are :

- 1st.—A reliable and satisfactory flow of Oil.
- 2d.—Clean Oil to ensure perfect Oiling.
- 3d.—Such a mouth to the Can as will prevent overflowing when being filled.
- 4th.—A permanent and constant elasticity secured to the bottom of the Can.

With this Can there will be no stopping up of the nozzle with dirt or sediment in the Oil ; no more use for broom wisps or wires, while it ensures a perfect working of the bottom of the Can at all times.

The Strainer is made to fit tightly in the nozzle, and when filling the Can it is only necessary to detach the nozzle, and with it the Strainer.

Per pair, \$6 00

IMPROVED NEW YORK CLUB SKATES.

PATENTED MAY 12, 1868.

Sizes 8½, 9, 9½, 10, 10½, 11 in

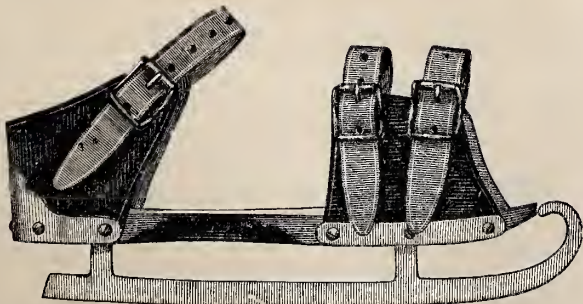

The great improvement in this over all other Clamp Skates, is that while one of the clamps is adjustable by means of a screw and key, the other is firmly fixed to the foot plate, thus preventing the Skate from moving when attached to the boot.

Per pair, \$4 50

LADIES' SKATES.

No. 44.

Sizes 7, 7½, 8, 8½, 9, 9½, 10, 10½ in.

BIRD'S DIFFERENTIAL PULLEY BLOCKS.

James Bird's Improved Patent, June 6, 1865.

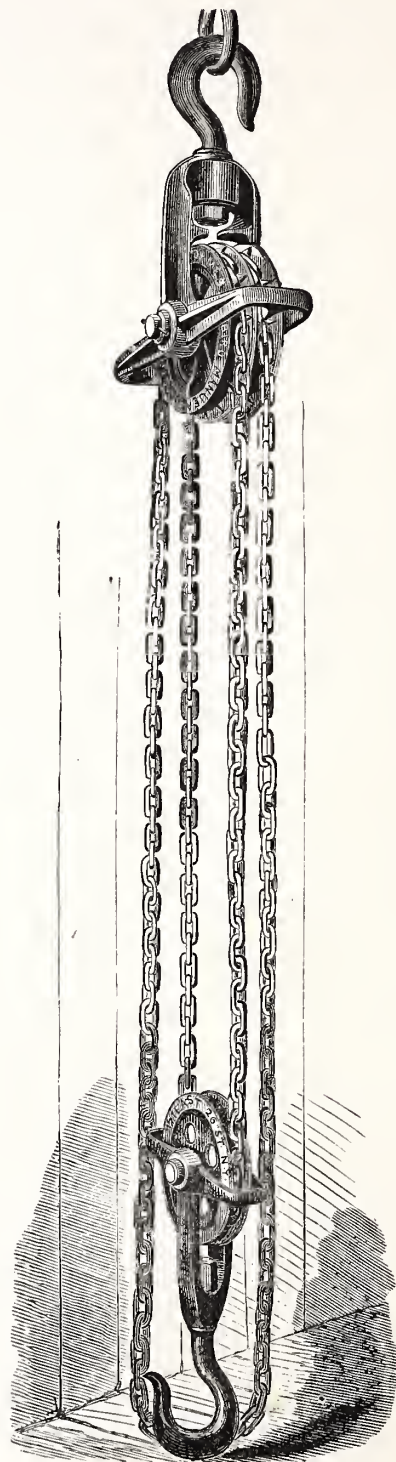

The peculiar merit of these Chain Blocks is that they retain more power than the Plain Blocks, and that they gain according to the double gear and extra chain. One man can hoist from one ton to three tons, and the block will hold the weight at any point.

Size of Block.	No. of feet of Chain in each Block.	No. of feet of Hand Chain in each Block.	Price.	Additional Chain per ft.	
				Block Chain.	Hand Chain for Hauling.
1 Ton.	30	20	\$50 00	\$0 45	\$0 40
2 "	30	20	120 00	0 55	0 40
3 "	30	20	160 00	0 60	0 40
4 "	30	20	180 00	0 70	0 40
5 "	30	20	200 00	0 90	0 40

James Bird's Improved Patent, Dec. 2, 1866.

One trial will prove the superior merits over all others. One man can hoist from 500 to 1000 pounds, and the block will hold at any point.

Size of Block.	No. of feet of Chain in each Block.	Price.	Price for additional Chain per foot.
$\frac{1}{2}$ Ton.	26	\$25 00	\$0 40
1 "	30	30 00	0 45
1 $\frac{1}{2}$ "	34	40 00	0 50
2 "	38	50 00	0 55

When ordering any blocks extra, please to state the height of lift and the weight, as all blocks are as priced above, with the same number of feet of chain in each. All orders forwarded upon receipt.
